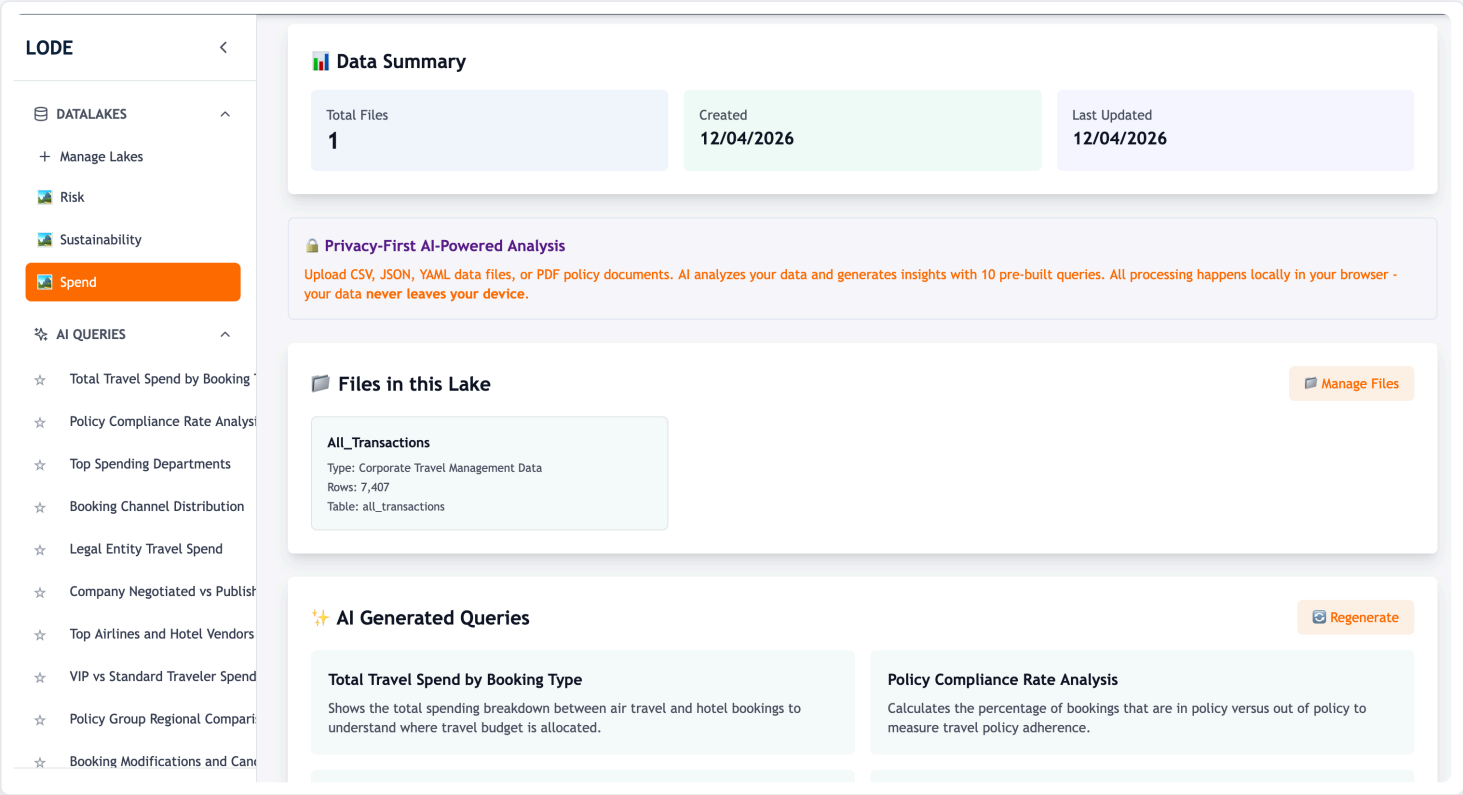
AI-POWERED TRAVEL ANALYTICS

Stop drowning in spreadsheets. Start making decisions.



Every hour you spend building reports is an hour that policy violations go unnoticed and money goes down the drain. LODE turns your scattered travel data into clear, instant answers — so nothing gets missed again.

✓ Data never leaves your browser

✓ Up and running in minutes

✓ No technical skills needed

✓ Works across all your data sources

Sound familiar?

Whether you manage travel for one company or one hundred, the story is the same. Month after month, the same slow, manual grind.

You're buried in spreadsheets

Hours every month copy-pasting data from booking tools, credit cards, and expense systems — just to build a basic report that's already out of date.

Savings are hiding in plain sight

Missed early-booking discounts. Hotels above the rate cap. Suppliers you've overpaid for years. The answers are in your data — but finding them feels impossible.

Your data is scattered everywhere

Travel data lives in multiple systems. Getting a complete picture means endless exports, merges, and pivot tables.

Enterprise tools are out of reach

Tableau and Power BI either cost a fortune, need a data engineer to set up, or require uploading sensitive employee data to the cloud.

There's a better way to work.

LODE brings all your data together for enterprise-grade analytics — without the enterprise cost, complexity, or privacy risk.

Everything you need to take control of your travel data

AI-powered analytics

Ask questions in plain English and get answers in seconds. No analyst, no waiting, no technical

Policy compliance

Upload your travel policy once. LODE flags non-compliant bookings automatically and in

GDPR & data security

Your data stays in your region, encrypted and isolated. Full

knowledge required. Just ask — and know.

real time — before the money leaves the account.

GDPR compliance is built into the architecture, not bolted on.

Real-time queries

Millions of records queried in seconds. Whether you're running a spot check or a full programme review, LODE keeps up.

Multi-tenant architecture

Managing multiple clients? Each one gets their own fully isolated environment, with white-label options included.

Custom dashboards

Build the view your stakeholders actually want — KPIs, trends, benchmarks — and share it in one click.

What LODE means for your working week

Get your time back

Cut monthly reporting time from 3-5 hours to under 30 minutes. Spend that time on work that drives results — supplier negotiations, policy improvements, strategic planning.

Uncover hidden savings

Spot booking patterns you'd never catch manually. Identify which routes, suppliers, and departments are costing you more than they should — and go to the table with hard numbers.

Sleep soundly on compliance

All processing happens in your browser. Employee personally identifiable information (PII), passport numbers, corporate card data — none of it ever leaves your device.

Report on ESG with confidence

Calculate CO2 emissions by airline, route, and department. Give your board the sustainability data they're asking for — without hours of manual calculation.

Walk into every meeting prepared

Answer ad hoc questions in minutes, not days. Back your recommendations with data, and build the kind of credibility that gets you a seat at the table.

Built for corporate travel teams, TMCs, and resellers

Travel management companies

Merge analytics across all your clients. Perfect for multi-client reporting and benchmarking.

- Multi-client dashboard with aggregate analytics
- Cross-client benchmarking and performance metrics

Resellers & partners

White-label solution with client management tools. Grow your analytics offering effortlessly.

- Full white-label branding options
